

will not make wholesale changes to our domestic policies until we know that you are willing to do the same.

So long as we maintain the status quo in our international trade agreements, then we should maintain the status quo with regard to our domestic farm policy as well. That is the type of message that I wish our trade negotiators were sending to our trading partners. And that is the message that I hope our trading partners receive today. That is the type of certainty that America's farmers need and deserve.

The legislation Senator TALENT and I introduce today will provide this certainty to our farming communities and send a strong signal to our trading partners. Congress will not make drastic changes to our farm policy without a meaningful agreement in the WTO.

By Mr. LUGAR (for himself, Mr. BIDEN, Mr. KERRY, and Mr. OBAMA):

S. 2697. A bill to establish the position of the United States Ambassador for ASEAN; to the committee on Foreign Relations.

Mr. LUGAR. Mr. President, today, I rise to introduce "The U.S. Ambassador for ASEAN Act", which signals the importance of bolstering the U.S.-ASEAN relationship for our mutual benefit.

ASEAN was originally established in 1967. The founding Members, Indonesia, Malaysia, the Philippines, Singapore and Thailand, remain as anchor participants of ASEAN today. Overall membership has expanded, with ten countries now comprising ASEAN.

Over the years, ASEAN has contributed to regional stability in East Asia and has partnered with the United States to combat global terror. In addition to promoting regional peace and stability, ASEAN is committed to accelerating economic growth, social progress, and cultural development.

ASEAN is the third largest export market for United States products, and has received approximately \$90 billion in direct investment from U.S. sources. Nearly 40,000 ASEAN students are studying in the United States.

The United States maintains bilateral relationships with the ASEAN Member countries. However, as ASEAN develops an integrated free trade area and addresses matters of common concern with the United States—ranging from environmental and financial challenges to avian influenza and terrorism—it is appropriate for the United States to enhance its overall relationship with ASEAN.

With this in mind, my legislation establishes the position of U.S. Ambassador for ASEAN, subject to advice and consent of the Senate. I believe this initiative will be an important step in advancing an already positive relationship. In addition, I am hopeful that once the position is established, the U.S. Ambassador to ASEAN will help facilitate ongoing implementation of

the ASEAN-U.S. Enhanced Partnership, announced last November by ASEAN leaders and President Bush.

By Mr. ALLARD (for himself and Mr. SALAZAR):

S. 2698. A bill to establish the Granada Relocation Center National Historic Site as an affiliated unit of the National Park System; to the Committee on Energy and Natural Resources.

Mr. ALLARD. Mr. President, I rise today to introduce my bill to designate the Granada Relocation Camp, also known as Camp Amache, as a National Historic Site in Colorado.

The Granada Relocation Camp, which is located in Southeast Colorado between the towns of Lamar and Holly on the Santa Fe Trail, played an important, and sometimes sad, part in United States history. In the 1800's travelers that came into Colorado along the Santa Fe Trail used it as a place to buy supplies and rest, and it was known as the "Gateway to Colorado". This put Granada on the map and the area was settled in 1873. By 1876 it was one of the largest cities in Colorado and endured a move further west for expansion.

The town is now best known for the Granada Relocation Camp, Camp Amache, which was established during one of the darker, but just as important time periods in American history. This camp, one of ten internment camps in the Nation, was established in August 1942 by the United States government during World War II as a place to house the Japanese from the West coast and was closed on August 15, 1945. Camp Amache was named after Amache Ochinee Prowers, the wife of John Prowers, the founder of the county in which Granada presides. It became its own little city with 30 blocks of barracks, school rooms, and mess tents. It also included its own post office, fire station, police, and hospital.

While this was a dark moment in American history, it is still an important part of it. By preserving this site, we are preserving our own history.

By Mr. BROWNBACK (for himself and Mr. LIEBERMAN):

S. 2699. A bill to promote the research and development of drugs related to neglected and tropical diseases, and for other purposes; to the Committee on the Judiciary.

Mr. BROWNBACK. Mr. President, today I introduced with my colleague, Senator LIEBERMAN, the Elimination of Neglected Diseases Act of 2006. This legislation is designed to confront and combat a group of dangerous parasitic diseases that together claim more than 500,000 lives each year and adversely affect millions more. These 13-15 neglected tropical diseases, NTD, as they are called, are the most common infections in the developing world, and include such debilitating diseases as leprosy, guinea worm, and trachoma. Many are described in the Bible, expos-

ing the sad fact that humans have been suffering from these diseases for millennia. Moreover, research has shown alarming rates of comorbidity of NTD's with HIV/AIDS, tuberculosis, and malaria, resulting in severe complications with these already devastating diseases.

The biggest challenge to finding cures for these diseases is the lack of a market. Pharmaceuticals are expensive to develop, and since neglected diseases disproportionately affect poor and marginalized populations in the developing world, there are fewer incentives for conducting research and development for new treatments. The purpose of this act is to encourage drug development by creating market incentives for investment in new research. Specifically, the bill awards a limited patent-term extension or patent-term restoration for certain lifestyle and tropical disease drugs provided the company successfully develops a new FDA-approved drug for an NTD. In this way, a drug company can recoup costs for the large investment in NTD research and development.

With the exception of market incentives, we have all the right ingredients to develop new drugs that would dramatically reduce the number of NTD cases and improve the quality of human life worldwide. I strongly believe that this legislation will add the last remaining step to jumpstart competitive research and development for combating NTD's. I urge my colleagues to join in this effort by supporting this bill.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 459—EXPRESSING THE SENSE OF THE SENATE REGARDING UNITED STATES PARTICIPATION AND AGREEMENT IN THE DOHA DEVELOPMENT ROUND OF THE WORLD TRADE ORGANIZATION

Mr. BAYH submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 459

Whereas in 2001, World Trade Organization members launched the Doha Development Agenda, a new round of multilateral trade negotiations with a core objective of increasing market access for nonagricultural products, such as industrial goods;

Whereas Ministers of World Trade Organization members agreed in the Doha Declaration that the aim of the nonagricultural market access (NAMA) negotiations is to reduce or eliminate industrial tariffs, with an emphasis on high tariffs and nontariff barriers;

Whereas, at the 2005 World Trade Organization Ministerial in Hong Kong, members renewed this commitment by agreeing to adopt a tariff-cutting formula geared toward the reduction or elimination of high tariffs;

Whereas, at the 2005 World Trade Organization Ministerial in Hong Kong, members agreed once again to reduce or eliminate trade-distorting nontariff barriers, and to focus on liberalization in certain sectors;
